

LINKMISR

ADVANCED STORAGE SOLUTIONS

No Other Storage Offers You More

INTRODUCTION

Link Misr is a leading industrial company specialized in manufacturing shelving and racking systems. We serve Egyptian, Arabian and African markets. The products are manufactured under license from Link 51 (UK), lista AG (Switzerland).

Link Misr was established in Egypt in 1993 in the new industrial city of Tenth of Ramadan, located 35 Km from Cairo. The product range includes shelving systems for various applications to meet different customer requirements: Light load shelves, medium load shelves and heavy load racks.

Narrow Aisle

Wide Aisle

Mobile Pallet Racking

XL PALLET RACKING

Multi Tiers

Link Mitr Pallet Racking System Products are designed, manufactured and installed under a quality management system conforming to the quality standards.

High Speed Roll-Forming technology is used in the production of XL Pallet Racking. Installation team employ special skilled people, equipment and techniques to ensure that Link Mitr storage system is assembled safely and efficiently.

Pallet Racking One of the most widely used systems for the pallet storage available today. Designed for Strength, ease of assembly and operational reliability. The XL System comprises a comprehensive choice of frames and Pallet support beams which are combined to meet the load requirements of any storage application.

Drive-in System

Satellite System

Live Storage

Double Deep

A very **SMART** Storage system

Link Mistr Long span is the leading heavy duty-loaded shelving system. Designed to complement the XL Pallet Racking Range.

Assembly of this adaptable shelving could not be easier. Frames and Shelf Support Beams simply clip together with Steel Shelf Panels placed in position.

Footplates allow racks to be secured to the floor for maximum stability.

**LONGSPAN
SHELVING**

There is also a wide range of sizes, beam loading capacities and accessories.

Link Mistr long Span Shelving is the ideal system for order picking, bulk storage of stationary products, the orderly storage of museums collection, and much more.

Linkspan Medium Span is the perfect solution no matter what you need to store from small components to heavy cartons. Fast and easy to assemble, Medium span uses modular design and a bolt-free lock-in system which requires no special tools, giving you maximum storage in minutes - whatever your available space.

MEDIUM SPAN SHELVING

Bearless Medium Span

Versatility as standard
to maximize your storage

Wherever there's a need for storage, there's a job for Euro Shelving.

Modular in design for ease of assembly, Euro Shelving offers almost limitless scope for the creation of customized storage facilities; and a complementary range of accessories extends its capabilities still further. Euro Shelving features unique shelf support clips that simply slot into place giving firm support for even the heaviest loading requirements, yet allowing for quick and easy repositioning whenever required.

SLOTTED ANGLE SHELVING

IDEAL
Shelving and
framing materials

Open up your storage area and your floor space with the shelving system that gives you maximum density and requires only a single aisle for access. Mobile Bases allow shelving runs to open, giving access to the desired aisle.

Link Mix offers a complete range of Mobile Shelving systems, Ranging from Light Duty for use in offices, to Heavy Duty for Industrial Requirements.

MOBILE SHELVING

For today's
working practices
REQUIREMENTS

The steel drawers provide secure high density storage. Modular design allows for hundreds of variations based on a range of standard drawers and partitioning material. This versatility allows components of diverse shapes and sizes to be safely stored within the same storage unit. Storage in drawers, rather than on shelves, allows small components to be stored closely together with space utilization of up to 95%. High density drawer storage allows fast retrieval as components are located and labeled in a logical sequence, clearly visible and easily accessed.
