Mobile Pallet Racking

Double Deep

Our Pallet Racking Systems come in several different styles, which can meet a varied range of storage challenges, offering both first-in first-out, and first-in last-out picking options. Whatever mechanical handling equipment you currently use, or would ideally like to use, our pallet racking systems can accommodate for several loadings and unloading methods, as well as semi-automated and crane served solutions.

Key Benefits:

- Top Quality, the key benefits of our varied range of warehouse racking and pallet storage systems are reliable strength – which is a result of our top-quality manufacturing process.
- Flexibility as we can create bespoke solutions tailored to suit your warehouse pallet racking requirements.
- Fully adjustable, all our pallet racking systems are fully adjustable within their design specifications to fulfil any changing storage requirements.

Satellite Storage System

LONG SPAN SHELVING SYSTEM

For Heavy Loads

Long Span is one of our leading systems for hand loaded storage of heavy or large items. Providing long, uninterrupted bays between frames, longspan shelving is ideal for a range of workplaces, including commercial, industrial and retail environments.

Our long span shelving uses the same boltless assembly principles as many of our other ranges, which makes it both easy to erect and simple to reconfigure if you need to adapt the system to change storage needs. This simple clip together assembly method where beams fasten securely onto uprights, makes longspan shelving ideal in workplaces where stocked items change in shape and size regularly. A wide range of shelf materials including steel, wood and timber can be chosen from to suit your storage requirements. A selection beam size options means that longspan shelving delivers a cost-effective solution for heavy duty storage requirements where items are loaded by hand.

EURO SHELVING SYSTEM

For Medium Loads

Wherever there is a need for storage, there is a job for Euro Shelving. From standalone single units to multilevel storage bays, Euro shelving is the single, simple to use, versatile solution.

Modular in design for ease of assembly, Euro shelving offers almost limitless scope for the creation of customized storage facilities; and a complementary range of accessories extends its capabilities still further.

Euro Shelving is the perfect answer for first time or growing heavy duty storage requirements. Featuring a simple design consisting of four types of upright frame and matching shelves in different widths from 900 mm up to 1400 mm.

STORMOR SHELVING SYSTEM

For Light Loads

Mono Shelving System

Solo Shelving System

Duo Shelving System

The Stormor Shelving range is a truly versatile and interchangeable storage system comprising of three upright types - mono, duo and solo. Between them, these three STORMOR shelving products cater for a wide range of storage requirements in offices, stockrooms and many more settings across multiple industries and sectors.

- **STORMOR Mono Shelving** - a cost-effective open frame system for varied applications
- **STORMOR Solo Shelving** - closed one-piece uprights ideal for commercial settings
- **STORMOR Duo Shelving** - closed dual skin uprights used to hide clips and provide extra support.

Accessories:
A wide range of accessories are also available which make STORMOR one of the most versatile systems on the market. These accessories include document, undershelf and full height dividers, back stops, bin fronts, floor plinths, pull-out drawers, shelves and cradles, garment hanging rails, half and full height doors & plastic drawer units.

Our accessories are designed to a standard size, so they work with mono, solo or duo frames. So, you can adapt the system to your growing storage requirements without having to worry about compatibility.

MEDIUM SPAN SHELVING SYSTEM

For Medium Loads

LinkMisr Medium Span Shelving System incorporates a wide range of beamless shelves, beams and frames, making it easy to customize to meet your precise storage needs. Medium bays can be combined in the same unit for efficient storage of a wide range of stock items. Purpose designed accessories are also available to extend the versatility of the Linkmisr medium span system still further.

LinkMisr Medium Span Shelving - Versatility as Standard to Maximize Your Storage

Medium span offers you virtually unlimited opportunities to expand your storage capacity, whether you are storing boxes, cartons & tubes. Medium spans from 1400 mm up to 2925 mm also make Medium span ideal for a wide range of big and bulky items.

- Quick and easy installation, with no special tools and saves you time and money
- Shelves are easily adjusted to your needs as stock patterns change

CANTILEVER SHELVING SYSTEM

For Libraries

Designed to meet the requirements of today's modern librarian

LinkMisr Library Shelving range is as versatile and adaptable as you need it to be, providing cantilever and normal & shelving system shelving with all the accessories you could need, including attractive finishes, signage, and display shelves.

Our broad range of on shelf accessories can be used to maintain ordering and categorization of book stock to improve the customer experience.

LinkMisr Cantilever Library Shelving is designed to hold up to the heaviest use and still maintain its great looks. All the shelving components are powder coated with a paint finish far superior to the industry standard. A concealed leveling system adapts to conditions for maximum stability, without loose shims. Numerous quality construction features provide durability, practicality and flexibility to meet your storage needs to offer years of quality performance.

MOBILE SHELVING SYSTEM

Mobile Shelving Systems are a cost-effective way of maximizing storage capacity and freeing up space in various working environments.

Mobile shelving is particularly effective in offices, archives, libraries or retail stock settings, as they represent a lower cost alternative to increasing floor space. In fact, mobile shelving systems can increase your storage capacity by 70% compared to conventional static options.

Mobile shelving options can be operated with simple push and pull handles, a three spoke mechanical option, or electronic push-button controls.

LISTA STEEL DRAWERS

The key component for all industrial and warehouse storage needs, **LinkMiser Lista Steel Drawer** are precision - built from high - quality steel sheet using the latest manufacturing techniques.

RACK CLAD BUILDING

The unique benefit of the **Rack Clad System** is that it does not require conventional structural columns to support the walls and roof. Being fixed directly on to the racking structure to complete the building, this solution offers considerable savings on construction time and cost.

Result:

The result: a self-supporting warehouse which makes maximum use of available surface area, where storage can be manual, semi-automated or fully automated. The structural design reviewed by our consultants inside Egypt and reviewed by Link51 UK outside.

- 100% storage space utilization
- 100% Building Quality Efficiency
- 50% Construction Time Save

Fully Automated System
